

BLADE-TYPE PLANT WRENCH

Quick and practical removal!

A blade-operated plant-cutter that allows the removal of stems of various diameters.

The blade hydraulically operated to remove the old plant and the longer roots, leaving room for the new plant. Applicable on our tool frame with joystick drive.

- Quick eradication
- Interlayer
- Plumber
- Can be used in any terrain
- Create a hole for the new plant
- Control via distributor or joystick
